Excellent for Healing and Protection

DZI which is pronounced ZEEÂ are stone beads of a mysterious origin.

In several Asian cultures, including that of Tibet, the bead is considered to provide positive spiritual benefit. These beads are generally prized as protective amulets.

Beads that are broken are believed to have a diluted benefit, because they have taken the brunt of the force that it is assumed would have otherwise impacted the wearer.

The most highly prized dzi beads are made of natural agate and were apparently manufactured in ancient times by an unknown people. There are also new dzi which gain popularity amongst Tibetans.
